SYLVIA JOZI

FULL STACK WEB DEVELOPER

sylviabj25@gmail.com | GitHub | LinkedIn | Twitter | Portfolio

SUMMARY

With more than three years of experience, I am a full-stack web developer who thrives on pair programming and team work. I have gained proficiency in utilising JavaScript and Ruby libraries and frameworks, and my five-plus years of experience as a statistics tutor have enriched my web development journey, fostering robust communication and problem-solving abilities. I thrive on the challenges of adapting to new technologies and keeping up with industry trends. I find joy in exploring the ever-evolving landscape of web development, constantly seeking opportunities to enhance expertise.

SKILLS

Front-End: JavaScript/TypeScript, React, Redux, React Native, HTML5, CSS3, Sass, Tailwind, Bootstrap,
Back-End: NodeJS, Ruby on Rails, Next.js, Django, Express, PostgreSQL, MongoDB, Firebase, Supabase
Tools & Methods: Git, GitHub, Netlify, Render, Vercel, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools
Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

FREELANCER (Upwork) — Remote
Software Developer — January 2026–Present

- I specialise in creating and maintaining websites for clients, whether they are short- or long-term projects:
  - writing code in JavaScript and Ruby libraries and frameworks.
  - creating a frontend by converting the Figma design into components.
  - Collaborate with clients to understand their needs and expectations.
  - debugging and ensuring that the websites are functioning properly.

- Contributing to open source projects.

Skills: React.js · Redux.js · Tailwind CSS · Bootstrap css · JavaScript · Ruby on Rails · NodeJS · Python

REALITY AI LAB — Remote
Software Developer — January 2025–November 2025

- I contributed to building and refining the full-stack architecture for Marvel AI, an AI teaching assistant, and Sky AI, an AI career coach. My work focused on creating user-friendly and scalable AI-powered education and career tools. Key responsibilities included:
  - Full-Stack Development: Designed and implemented front-end interfaces using ReactJS and integrated them with scalable back-end services using Node.js.
  - Cloud-Based Deployment: Deployed robust applications on Google Cloud Run, ensuring real-time responsiveness and seamless user experience
  - Database Management: Managed structured and unstructured data using Firestore DB, Firebase Realtime DB, and Redis to support fast and reliable AI workflows.
  - Testing & Debugging: Conducted comprehensive testing, identified and resolved bugs, and used LogRocket and Log Explorer for performance monitoring.
  - Collaboration on Innovative Projects: Worked alongside cross-functional teams to bring cutting-edge solutions like AI agents and real-time recommendation systems to life.

- ➢ Version Control: Maintained source code, performed code reviews, and contributed to team workflows through GitHub and automated CI/CD pipelines using GitHub Actions.

Skills: Firestone Database, Google Cloud Platform (GCP), DevOps & CI/CD, Backend Development, and Front-End Development

FREELANCER — Remote
Full Stack Web Developer — February 2024 – December 2024

- ❖ Created projects using technologies such as JavaScript, React/Redux, NodeJS, and Ruby on Rails.Some of the projects include:
  - ➢ Proshop - It is an end-to-end application with a seamless user experience and interactions. The customers can search for the product and purchase it online. The admin manages the application and has CRUD permission. It authorises and authenticates users, allowing them to place an order after authentication and have access to their accounts.
    Built with MongoDB, Express, React, NodeJS, CSS, and Bootstrap.

  - ➢ Space Travelers' Hub — This web application helps users manage their rocket and mission reservations for space travel. I worked with a two-person team, concentrating on creating the mission page, fetching data. This project involved integrating data from APIs, writing tests using Jest, and managing the styling aspects.
    Built with: React/Redux, CSS and Jest

GREENVIEW TUTORIAL CENTRE / SELF-EMPLOYED — Johannesburg
Data Analyst/Private Tutor — March 2014–September 2022

- Providing statistical support to college students and communicating complex statistical concepts clearly resulted in a 90% overall passing rate, with some students obtaining distinction and achieving excellent grades.
- Private client data analysis, advanced statistical methodologies, and research, as well as data visualisation and interpretation to their satisfaction, resulted in 10% more referrals.
- I not only tutored students in statistics and financial modelling but also directed the college's performance data analysis, which led to a 5% improvement for the college.
- Proficient in statistics tools: R, Python, SQL, Excel, SAS, and SPSS.

Skills include teaching, communication, mentoring, and data analysis.

EDUCATION

MICROVERSE — Aug 2022 – Dec 2023
Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard Gitflow, and daily standups to communicate and collaborate with international remote developers.

UNIVERSITY OF SOUTH AFRICA — Feb 2017 – Nov 2020
BSc Honours in Statistics

● Thesis: The effectiveness of the job creation program and its association with unemployment, highest education,

- The thesis examines the effectiveness of the job creation program and its association with unemployment, education levels, gender, and provinces using the log-linear analysis method.

OTHER CERTIFICATES:

- Udemy:
  - Learn JavaScript: Full-Stack from Scratch
  - The Ultimate React Course 2024: React, Redux and More
  - Become a WordPress Developer: Unlocking Power with Code
  - MERN from scratch 2023, E-commerce platform
  - TypeScript MasterClass 2025

- AWS:
  - AWS Certified Developer Associate (In progress)
